DETAILED ACTION

Double Patenting

1. Claims 1- 50, 52-55, 57, 58, 61-71 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-60 and 65-71 of U.S. Patent No. 6.694.429 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the "trusted network" and "untrusted network" recited in the parent application are equal to "first network" and "second network" recited in the instant application. The limitation "telecommunication access network" recited in the parent application is equal to "an access network" recited in the instant application.

2. Claims 72-75 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 61 - 64 of U.S. Patent No. 6.694.429 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they "recite receiving a setup request for a call" and "sending state information for the call".

Claim Rejections - 35 USC § 112

3. Claims 51, 56, 59 and 60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The instant claims are incomplete.
